

Nathan Fields
Director of Biotechnology, National Corn Growers Association

Mr. Nathan Fields is the director of biotechnology at the National Corn Growers Association. He has been with the National Corn Growers Association since 2004 and currently is responsible for the association's biotechnology, economic analysis, and crop protection programs.

Prior to his employment with National Corn Growers Association, Mr. Fields worked in the biopharmaceutical industry managing research and development, production and process development of pharmaceuticals, and DNA extraction and purification. His post-undergraduate work included involvement with the private sector effort on sequencing the human genome.

Mr. Fields graduated from the University of Illinois with a B.S. in biology from the University of Illinois and completed his Masters in Business Administration from Southern Illinois University in Edwardsville.

Mr. Fields has not previously testified before the Commission.
